

# Objectives

In this section you will:

- Understand the purpose of an operating system.
- Describe a Command Line Interface (CLI) operating system.
- Describe a Graphical User Interface (GUI) operating system.
- Be able to describe the differences between the two interfaces and describe the benefits and drawbacks of each type.

# Success Criteria:

You Must: Successfully complete questions 1 and 2 from the 'Operating Systems - Task 1' work sheet.

You Should: Successfully complete question 3 from the 'Operating Systems - Task 1' work sheet.

You Could: Do all of the above and solidify your learning by successfully completing the practice questions and games on the unit 1 menu page.
